## PRESS RELEASE

### Digital Pressure Controller

The Bronkhorst Hi-Tec digital pressure controller is a compact self-contained closed-loop electronic control system. It is used in a wide range of applications in the semi-conductor industry such as precursor source delivery and a large number of other industrial applications such as fermentor pressure control.

Two styles are available viz. forward pressure control and back pressure control.  
The ranges start at 100 mbar up to 400 bar.

The pressure controller has the same footprint as the standard mass flow controller and is available with analog voltage or current output signals plus additional RS-232 for diagnostic purposes. Furthermore it is available with Profibus or DeviceNet protocols.
